

Brian Smith

Full Stack Developer

I am a dedicated developer with experience in JavaScript, React, MongoDB, Node.js, Express, and MySQL. Having completed several projects, I possess a strong foundation in web development and a passion for creating robust and scalable applications. From frontend to backend, I utilize my skills to build intuitive user interfaces and efficient server-side architectures. Constantly eager to learn and adapt, I thrive on tackling new challenges and staying up-to-date with the latest technologies. With a drive to make a positive impact in the development field, I am ready to contribute my expertise to future projects.

Skills

● Front End Development

Javascript
HTML
CSS
React.js
Redux
Bootstrap

● Back End Development

MongoDB
SQL
Express.js
Node.js

Projects

● Portfolio Site

March 2023

- Developed and launched a professional-grade portfolio website using the React framework.
- Designed and implemented an innovative and visually-stunning interface to showcase my skills and achievements.
- Employed a variety of front-end technologies, including CSS, HTML, and JavaScript, to create an engaging user experience.
- Utilized best practices in web development, such as responsive design and cross-browser compatibility, to ensure optimal performance across all devices.

Full Stack Developer

Projects

● Quiz App

Apr 2023

- Designed and developed a feature-rich quiz application utilizing a wide range of technologies, including JavaScript, React, Node.js, Redux, and MongoDB.
- Implemented a responsive and intuitive user interface using React, ensuring an engaging and seamless experience for quiz participants.
- Developed a scalable backend using Node.js and Express, facilitating the handling of quiz data, user authentication, and database interactions.
- Utilized Redux for state management, allowing efficient data flow and ensuring consistency throughout the application.
- Integrated MongoDB as the database system, efficiently storing and retrieving quiz questions, user responses, and other relevant data.
- Implemented advanced features such as multiple choice, user authentication and scoring mechanisms, enhancing the overall functionality of the application.

● Chat App

Feb 2023

- Developed a user-friendly 2-user chat web application using JavaScript and Socket.IO.
- Implemented real-time communication between users through the utilization of Socket.IO's event-driven architecture.
- Designed and developed the front-end user interface using HTML, CSS, and JavaScript, ensuring an intuitive and visually appealing experience.
- Utilized Socket.IO's library to establish a WebSocket connection between the server and clients, enabling seamless real-time messaging.
- Conducted thorough testing and debugging to identify and resolve any issues or bugs, ensuring a robust and error-free application.
